Solution-

```cpp
class Solution {
public:
    void moveZeroes(vector<int>& nums) {

        int count=0;
        for(int i=0;i<nums.size();i++){
            if(nums[i]!=0){
                nums[count++]=nums[i];
            }
        }

        while(count<nums.size()){
            nums[count++]=0;
        }

    }
};
```
